Welcome Change for Improvement Seems Assured and Confidence Grows.

INCREASE SHOWN IN TOTALS.

Mountain Lake Gains Four Cents. During Regular Call Run-Other Stocks Are Awakening.

The local mining stock exchange was slightly stronger this morning and a better feeling seems to be taking the place of the timidity displayed by dealers during the past week Live-lier trading resulted and firm figures were recorded for the forenoon, Daly by dealers during the pass the trading resulted and firm figures were recorded for the forenoon. Daily studge was offered at \$9.50 and 350 shares were promptly snapped up at this figure. No more changed hands. A block of 100 Nevada Hills sold at \$3.55 during the regular call and another block of 100 shares brought the same price on the open board. Mountain Lake is a strong stock at present and this morning made a climb of 4 cents. It opened with the sale of 400 shares at 64, followed by a second sale of 200 at 56; a third of 100 at 67 and a fourth and closing sale at 68. Colorado Mining was an active seller but during the rapid transferring lost 2½ cents off opening price. The stock opened at \$2.35. A second sale of 1,500 shares knocked off 5 cents but the transfer of 2,100 shares brought \$2.32½. Another 360 sold on the open board at the last figure.

New York called for 18 this morning and this resulted in 1,100 shares being sold. Yankee is a little lower. It opened at 54 at which figure 500 were transferred; 100 then sold for a cent less and 200 sold for 52. The last sale was made on the open board. Star Consolidated was fairly active 1000 going at 35½ and 1,500 at 35. Two blocks of Seven Troughs, comprising c,000 shares, changed hands during the open board trading. The first block included 1,000 at 42 and 5,000 at 42. The forenoon sales and closing quotations follow:

COMPANY FORMED.

Steptoe Lead and Copper Co. Now Ready for Development Affairs.

Articles of incorporation of the Step Articles of incorporation of the Steptoe Lead and Copper company were
signed in this city today. This company includes A. J. Davis, William H.
Tibbals, C. M. McEntire, M. Woodbury
and others and takes over the Sahara
group of four claims owned by Mr.
Davis and others. The property is located in the Duck creek district near
the site of the Steptoe smelter being
built 14 miles east of Ely. The company is organized for \$1,000,000 divided
into as many shares of a par value of into as many shares of a par value of \$1 each. The incorporation was effect-ed under the laws of Arizona. Mr. Tibbals has just received a letter from Gallagher Bros. of McGill, Nevada, de-scribing the conditions at the mina. They did the assessment work last fall and are thoroughly acquainted with the entire district. They report every-thing O. K. and sent in 15 pounds of ore thing O. K. and sent in 15 pounds of ore which they took from a 20-foot cross-cut in the tunnel. Neither wall has been cut through yet, according to the letter. Ore has been found which goes 50 per cent lead. Better ore is found in a three foot vein of high grade. Many strikes are being made in the district and great interest is being displayed by surrounding camps.

The new company will order surveys for patent at once. The ledge uncovered will be explored and the tunuel work continued. This tunnel was commenced last fall.

menced last fall.

KNOW LOUIS D. GORDON.

Salt Lake Mining Stock Broker Aided In Making New Nevada.

Louis D. Gordon of the firm of Gordon and Beason, stock brokers of Salt Lake, returned to that city after spending a week in Round Mountain, inspecting his extensive mining and real estate inter-

extensive mining and real estate interests in this camp.

Mr. Gordon expressed himself as very well pleased with developments here since his last trip. On the Homestake property, of which company he is president, two good ore stringers have been struck and local interest in the stock has been keen during the past week as a result. The shaft is now down about \$6 feet and the formation is identical with the Daisy and Fairview. The Homestake gives promise of being one of the best properties in camp, as it is expected, to tap several of the famous ledges at depth. Mr. Gordon stated that his company expected to sink 200 feet before crosscutting.

feet before crosscutting.
Louis D. Gordon is one of the makers of New Nevada. Long before Round Mountain was thought of as a mining Mountain was thought of as a mining camp, Mr. Gordon was searching the hills for their hidden wealth. He has a working knowledge of nearly every mining camp in the state and is thoroughly acquainted with the formations of the various districts. His opinion on mining matters and stock investments should be invaluable to the clientele of the new firm.

the new firm.
It was the famous strike on the Sunnyside claims at Round Mountain that put Mr. Gordon on Easy street in a fi-nancial way. The property was sold to the Round Mountain Mining company and is now known as one of the best properties in the state. Mr. Gordon still retnins a large block of the stock. He will hold his mining interests in the district which has done so much for but will make his future hom-Lake, where he has heavy re alt Lake, where he has heavy realty oldings and where his family now re-

The Nugget wishes Mr. Gordon all kinds of success in this new venture.-Round Mountain Nugget.

M'KINLEY TO PRODUCE. Idaho Property is Preparing to Ship After Eight Years' Prospecting.

Mining men in the Idaho City section are manifestiing keen interest in the preparations now being made for placing the McKinley Gold property upon the production basis at an early date. The prospect work on the property has been long and thorough, covering a period of over eight years. Mine superintendent McKinley states that the preliminary work on the main tunnel site is practically completed, and that as soon as the necessary machinery can be installed the tunnel bore will start into the side of Jupiter mountain with the purpose of penetrating the mineralized veins at right angles. He also states that the financial backing of the company is now Mining men in the Idaho City section cial backing of the company is now fully assured, and that the mine opera-tions will be conducted on a scale entirely adequate to the proven value of the property. Assays taken from the McKinley claims have shown values running as high as \$2,000 to the ton in gold, the general average being about \$60.

HUGHITT AT WHITE HOUSE.

Washington, March 28.—Marvin H. Hughitt, president of the Chicago & Northwestern railroad, a member of the board of trustees of the foundation for the primotion of industrial peace, was among the president's guests at luncheon today. Other members of the beard present included Seeys, Wilson and Strauss Seth Low, Thomas G. Bush, Labor Commissioner Neill and James B. Reynolds. It was said at the White House that Mr. Hughitt's visit was not for the purpose of discussing the railroad situation with the president. Secy. Loeb said that other than the luncheon for today, Mr. Hughit had no engagement with the president.

BINGHAM MERGER IS EXPLAINED

Letters Being Distributed Which Furnish Full Information to Those Interested.

DIRECTORS OUTLINE PLAN.

The Central and Standard Are to Get Together and Promise to Make Big Producer.

Particulars of the Bingham Central and Bingham Standard consolidation and reasons for the same are contained in letters being mailed to stockholders of the Bingham Standard. Extracts from these follow:

"The Bingham Central Mining company owns about 190 acres of very desirable patented ground; has substantial equipment of buildings and machinery; approximately 9,000 feet of development work by which its properties are being opened up at depth to develop the ore bodies from which considverior the ore sodies from which considerable quantities of ore were extracted at snallower depths a number of years ago. Some of these ore bodies have been penetrated and considerable quantities of ore developed, which will be available for profitable extraction when more favorable transportation facilities are at hand.

more favorable transportation facilities are at hand.

"The Bingham Standard Copper company owns about 120 acres of ground adjoining the Bingham Central properties on three sides. The patented ground belonging to the Standard company is about equal in area to that of the Central company. The Standard company has workings on its various claims to the aggregate extent of several thousand feet. Most of these workings concist of shallow tunnels driven several years ago, from which a combined production of over \$500,000 is estimated to have been realized.

PROPERTIES DESCRIBED.

PROPERTIES DESCRIBED.

PROPERTIES DESCRIBED.

"The properties of these two companies, when combined, it is believed, will make one of the greatest producing mines in Bingham camp. The mining property thus held will consist of one single group of approximately 510 acres, bounded on the west by the properties of the Bingham and New Haven Copper and Gold Mining company, and the Utah Consolidated Mining company; on the north by the Boston Consolidated Mining company, and the United States Mining company and Last Chance group, thus leaving only the southerly end which is not directly in contact with developed and producing mines. The location of this territory with respect to these surrounding mines, the record of production from earlier workings in both the Central and Standard properties, and the developments recently made, justify the beilef amounting practically to an assurance that ore bodies will be developed within this territory equal to those in the adjoining and more thoroughly developed ground of its promnent neighbors.

SURFACE EQUIPMENT.

SURFACE EQUIPMENT.

The Central company owns an elec-"The Central company owns an elec-trically operated air compressor of a capacity sufficient for five to seven ma-chine drills; substantial bulidings, office and superintendent's residences; all its tunnels and workings are piped for air in a substantial way with pipe of am-ple size; its tunnels are laid with neavy rail; it has complete equipment of air receivers, machine drills, ore cars and all the usual processary appliances for

rall: it has complete equipment of air receivers, machine drills, one cars and all the usual necessary appliances for proper mining, including two blacksmith shops with full equipment.

"The Mountain Maid tunnel, belonging to the Central company, is located about 500 feet south from the Jeff Davis tunnel. It has a length of about 500 feet in a westerly direction toward the Julia S. group, belonging to the Standard company. Good values in both lead and copper ores have been found in these workings, though no considerable bodies have yet been developed.

WORKINGS AND VALUES.

WORKINGS AND VALUES.

The Whitley is the longest working tunnel of the Central company. It starts on the Wide West No. 2 claim and runs in a southerly direction 2,000 feet This tunnel is primarily to devenop at depth the fissures showing ore bodies of considerable size in the lime of the old workings of the Elephant and Apex claims. These fissures have been cut and considerable bodies of silverlead ore, having a value of \$40 to \$50 a ton have been encountered. The face of ton have been encountered. The face of the Whitley has a vertical depth below the old workings on the Elephant claim of 513 feet. These old workings verti-cally above the face of the new tunnel, are at least 100 feet below the surface, so that it may be said that the face of the Whitley is over 600 feet below the the Whitley is over 600 let.
surface at the present time.
"The Jeff Davis tunnel, belonging to
the Central company, develops the Bon-

ham claim of that company. The length of the tunnel proper is 1,000 feet, with cross-cuts, drifts and raises from with cross-cuts, drifts and raises from the tunnel amounting to about 1,599 feet. This tunnel and its adjacent workings have developed considerable bodies of low-grade supplies, copper ores, similar to those characteristic of the Bingham district, containing assay values as high as 5 per cent copper and \$2.50 to \$4 in gold and silver, and 40 percent excess of iron. The old Bonham workings, 175 feet above the Jeff Dayls tunnel level, and which have Davis tunnel level, and which have been connected with it by a raise, show large bodies of one like in character to those cut on the tunnel level. The old Bonham workings are 100 feet or more under the surface, so that at this point, we have a depth of nearly 300 feet on these large bodies of sulphide."

ALL SUMMED UP. In summing up the matters connected ith the consolidation the letter says: with the consolidation the letter says:

'In attempting to arrive at a fair hasis for consolidation, it was decided that the two properties could be considered equally, the greater development and more extensive equipment of the Central company balancing the greater acreage held by the Standard company. Either of these properties will, without question, develop much larger and more valuable ore bodies than those aiready known to exist; but both properties together can be develoth properties together can be devel-ped and operated as economically as ither alone, and wil form one of the argest and most valuable groups in cham district.

"From the point of view of the Bing-nam Standard Copper company, the consolidation is especially desirable for

consolidation is especially desirable for the following reasons:

"It affords ample funds for develop-ment purposes and relieves this corpor-ation from its floating liabilities.
"It furnishes this corporation with unnel sites, and development work which could only be obtained as a re-uit of an immense expense and years

"It secures to the concollidation the support and experience of a management to whom is largely due the development of Bingham as a copper camp.

ARIZONA IS ACTIVE.

Mineral Belts of That State Are to be Worked Thoroughly. Special Correspondence.

Prescott, Ariz.-Reports received here from all the important mining centers of the territory have developed the fact that millions of dollars are being expended for the equipment of both old and new properties with mining machinery of all kinds. Orders have been placed with manufacturers for very extensive supplies of busting plants. and new properties with mining machinery of all kinds. Orders have been placed with manufacturers for very extensive supplies of hoisting plants, pumps of high capacity, engines, compressors, drills, piping mill equipments and all the requisites for large mining operations according to the most approved and scientific methods. It is widely recognized among experienced mining men that all this modern, laborsaving machinery will make it possible for one man to do the work of 10 of a few years ago. The chief need of the copper mining industry of the territory just at present appears to be in the line of adequate smelting facilities; but this need is being rapidly supplied. Not only have old smelters been overhauled and improved but a large number of producing companies have gone extensively into the construction of new smelters of enormous capacity and designed to meet the requirements of the many grades and kinds of ore now being handled. It is a matter of note that the increase in the copper production of the United States during 1996 amounted to only about 5 per cent, but that the larger part of this increase is credited to Arlzona. Among the most active of the companies now being developed in the effort to meet the increasing demand for copper ore the Hull properties, the Verde Grande, and the Consolidated copper creek in Yovapai county, the Dan O'Carroll group in Pinal county, and the Mansfield in Santa Cruz county. These mines are all situated upon the same great mineral belt extending diagonally across the territory; and they are all making rapid progress and installing extensive equipments of machinery and supplies.

TELEGRAPH AT WONDER.

TELEGRAPH AT WONDER.

Within the next few days Wonder will be connected by telegraph with the will be connected by telegraph with the outside world, and the unsatisfactory system of repeating messages by telephone will be at an end, says the Wonder Miner. As soon as the new building which is being erected by the telephone company is completed the office will be moved into it and a telegrapher related to the control of the interest. added to the force. The instruments and other equipment have arrived and the gladsome click of the metallic sounder will soon be heard. The tele-phone wires will be used for sending telegrams. The messages will be trans' mitted to the office of Hazen and then taken by the Western Union line. Ne-gotiations are also on foot between the owners of the local line and the Western Union people for a direct wire into the offices of the latter at Reno. It is thought that the matter will be satis-factorily adjusted in a short time.

NEW STOCK ABOUT DUE.

Balaklala to Enable Itself to Build Enlarged Plant-Company's Plans.

The new stock issue decided upon by the Balaklala Mining company is about due and it is believed the new stock will be distributed among shareholders within a few days. With the money from this source in its hands the com-pany will be able to commence work on the enlarged 2,0000-ton plant under conthe enlarged 2,0000-ton plant under contemplation for some time. Construction
on the first unit is wel under way. This
consists of three water jacket furnaces
and one reverberatory furnace. The
second unit will be similar. The company has two million tons of ore in
sight and blocked out and one million
tons are ready for stoping at any time.
Copper can be extracted at very little
cost as the ore is self-fluxing. On a
11 cent market the company can make
thre cents a pound, it is asserted and
with high prices predominating more
than satisfactory values could be obtained. The Balaklala plans to place tained. The Balaklala plans to place 100,000 shares in its treasury and as the issue covered 600,000 shares 500,000 will be outstanding. The treasury stock is to be used to meet the present out-standing bond issue but it is asserted that this is not to be done until the company is on a copper producing ba-

UNITED STATES PROSPEROUS.

"On all market recessions the shares of the United States Smelting, Refining & Milling company should be a purchase, says the Financial News of Boston. The company is prosperous and the advice is good. The United States present prosperity came from the operation of two units of its entire plant. These are the lead and copper plants at Bingham and the Mammoth mine in Shasta county. California. The latter has been earning \$100,000 a month and within three months or so this monthly earning will be increased at least one-quarter. The property is equipped with a battery of three furnaces, but two new ones are being installed. The Real del Monte property in Fachucha, Mexico, which is really ten mines under one management promises to add to the company's earnings and the Richmond-"On all market recessions the shares company's earnings and the Richmond-Eureka also promises to contribute a generaus share of dividends in the near future.

PROVO MINING NOTES.

Numerous Deeds Are Filed With County Recorder. Special Correspondence.

Provo, March 28.—The following mining deeds have been filed for record with the county recorder. The affords ample funds for development purposes and relieves this corporation from its floating liabilities.

STOCKS MUCH MORE STEADY

Prices at Opening Were Irregular Though Fluctuations Were Less Violent Than of Late.

ACTIVITY WAS SPASMODIC.

After an Extended Advance Was a Brisk Selling Movement-The Close Was Firm.

New York, March 28 .- The movement of orices of stocks was very irregular in opening dealings, but fluctuations were not so violent as has been usual ecently. A rise in Great Northern preferred of 3% was due to the decision of the Minnesota court upholding the legality of the new stock issue. Stock prices displayed a uniform ten-

lency upwards after business had been under way a few minutes. Buying of Reading, the principal metal stocks and Reading, the principal metal stocks and the Hill and Harriman groups, imparted a strong tone to the speculation. Great Northern preferred rose 44. Northern Pacific and Reading 34. Northwestern, Union Pacific 25. Amazgamated Copper 24. Sinciting 24. Archivolation and service and there were occasional relapses in some stocks.

The market's activity both on advances and declines was spasmodic. After the

The market's activity both on advances and declines was spasmodic. After the advance had been somewhat extended a brisk selling movement wiped out most of the principal gains. St. Paul was carried 1% helow last night. The selling movement then subsided and the market became dull.

Very little business was done between 12 and 1 o'clock, and prices were not essentially changed. The tope was growing rather heavy owing to the restricted demand.

mand.

Speculative operations were on a small er scale than for some weeks and prices drifted narrowly. American Express fell points and rallied 3. The market closed steady. Prices fell back to a traction below yesterday and the whole list receded and then rallied. Prices were marked up quite rapidly again in the late dealings transactions were small.

CHICAGO.

CHICAGO.

Chicago, March 28.—The wheat market opened weak because of liberal receipts in the northwest and an official forecast of rain in Kansas. Local holders sold freely at the opening. May wheat opened 1/2 to 3/2 lower at 154, to 754, and sold at 154/2754, and reacted to 155/2754.

Trading in the corn pit was very quiet and prices were steady. May opened 1/4/2 lower at 45% and sold up to 45%.

Oats opened firm with a fairly active trade. Shorts covered freely in the early part of the session and commission houses were fair buyers. May opened unchanged at 42% and sold up to 15/2642%.

The provisions market was steady on a 5240 cent advance in the price of live hogs. Later prices weakened somewhat on realizing sales. May pork opened 24/2 higher at 16.50, and sold at 16.15; lard was 5 cents higher at 5.50, and declined to 8.574. Ribs were up 7% at 8.574.

There will be no market tomorrow, Good Friday.

The market became firm in the last half of the session on reports that the green bug has worked his way into Missouri. The high point for May was 75%. The close was steady, a shade lower at 75% of the market was dull all day and show-

close was steady, a snade lower and showindig.

The market was dull all day and showed but little change in prices. The high
point for May was 46% and the close was
steady, 14 lower at 45% 275%.
